Dear Dr. Pluviose!

I have read your paper "Stabilisation of flow through steam-turbine control valve" (Trans.ASME, V111, Oct.1989) with great interest, because I had investigated the same phenomena many years ago.

I appreciate your idea of notched seat; my proposals were much more simple but not so effective as yours. You can see them from our paper, that I'm glad to send you (sorry, it is in Russian).

I feel that our collaboration in future might be useful.

Sincerely yours,

I.W.Rzheshnikov

M.Pluviose
